Summary

Entry-level DevOps Engineer with practical experience in Linux Administration, AWS Cloud Services, Git, GitHub, GitHub Actions, Docker, Jenkins, Ansible, CI/CD, Infrastructure Automation, and Version Control. Developed automated deployment pipelines and cloud-based applications through hands-on projects. Strong problem-solving skills and a keen interest in DevOps, Cloud Computing, and Site Reliability Engineering (SRE).

Education

DRK Institute of Science and Technology

Computer Science & Engineering (CSE) | Bachelor of Technology (B.Tech) | Hyderabad

12/2022 - Jul 2025

Achieved a success rate of 69%.

Samskruti College of Engineering & Technology

Electrical and Electronics Engineering (EEE) | Diploma

Jun 2019 - Jul 2022

Achieved a success rate of 72%.

Skills

Hard Skills

Azure (Vnet Vm Load balancer), AWS (EC2 VPC Load Balancer Auto Scaling IAM Basics S3), GitHub actions, Jenkins, Github, Terraform, Git, Docker, Basics Kubernetes, Linux.

Projects

Auto-Deploy Student Portfolio Using GitHub Actions CI/CD Pipeline

05/2026

- Technologies: GitHub Actions, S3 Bucket, CloudFront (CDN), IAM basics,
- Automated website deployment using GitHub Actions workflows, Git, and CI/CD practices.
- Developed and automated the deployment of a student portfolio website using GitHub Actions.
- Created CI/CD workflows using YAML to automatically build and deploy application updates.
- Integrated GitHub repository events to trigger automated deployments on code commits.
- Reduced manual deployment efforts and improved deployment consistency through automation.

3-Tier Architecture on Azure:

03/2026

- Technologies: Microsoft Azure, Virtual Machines, Networking, Load Balancer
- Designed and deployed a 3-tier architecture consisting of Web, Application, and Database layers on Microsoft Azure.
- Configured Azure Virtual Machines and networking components to enable secure communication between tiers.
- Implemented load balancing and security configurations to improve application availability and reliability.
- Deployed and managed cloud infrastructure on Azure by implementing virtual networks, configuring storage solutions, and administering resource groups.
